

NET PROTECTION CONCEPTS  
INTERNATIONAL CO., LTD.

**DRIVE  
SUCCESS  
WITH IT**

## NET PROTECTION CONCEPTS INTERNATIONAL CO., LTD.

Our company has been operating as Systems Integrator in Thailand since January 2003. Originally starting out as an IT security company we now have specializations and expertise within Network Solutions, Security & Compliance as well as Automation, Messaging and Analytics. Our success is driven by our team and their commitment to meet and exceed our customer's requirements - by applying innovative technologies and methods, executing with excellence and operating responsibly.

We partner only with the Industry's leading providers of proven technologies, such as Cisco Systems Inc., TIBCO Software Inc. and Outpost24 to build around our high-quality end-user solutions.

**Our success relies on our dedicated, multi-platform support team who is continually driving business value and executing our strategy. Through our talent recruiting & development system, we offer programs that enable our team to continuously grow and contribute to our success.**

### **Business Orientation:**

We believe that IT must be business oriented to help support and optimize business transactions as well as secure proprietary data and operations

### **Teamwork:**

We put a great emphasis on teamwork; as we know that everything we accomplish rests on the skills, integrity, commitment and dedication of our employees.

### **Honesty And Sincerity:**

Everything we do reflects a commitment to the standards of personal and corporate ethics.

### **Rewarding Relationships:**

We believe in developing & nurturing long term partnerships; focus on creating values and trust by understanding the fact that relationship building is a process not an event.

## **Detailed Design And Engineering**

Our staff are experienced in all aspects of engineering design and is capable of carrying out both front-end process design/basic engineering and detail engineering design tasks. We have a good understanding of the process requirements and specifications used by most of the main corporations in the region. Our engineering design team is tailored to specific project scope requirements.

## **Project Management**

Project Management includes developing a project execution plan, which includes defining project goals and objectives, specifying tasks, project organizational chart, integrated system testing, integration with 3rd party and timelines for completion. It also includes implementing the project plan, along with careful controls to stay on the 'critical path', that is, to ensure the project is being managed according to plan.

## **System Integration And UAT**

We specialize in bringing together components and subsystems from various manufacturers and technology disciplines to deliver an optimized, integrated and cost effective solution. All integrated systems undergo extensive testing in our System Integration Center. This testing can be the subject of a witnessed 'User Acceptance Test' prior to shipping and installation at the customer site.

## **Training**

We have experienced trainers who can conduct all aspects of training from Solution Basics to Operation & Maintenance. Such training is conducted either in house or at the customer's premises.

## **Support, Operation & Maintenance**

**Net Protection Concepts International Co., Ltd.** provides comprehensive support to its customers based on the defined Service Level Agreements through phone, email and onsite service either as a 5/8 or 24/7 agreement with predefined response times.
